

## **Warsaw School of Economics can be your partner**

Centre for Development of Distance and Permanent Education is looking for interesting national and international e-learning projects and research. Warsaw School of Economics would like to participate in them as a partner or an observer.

### **We can offer:**

- our experience in implementing e-learning platform e-sgh.pl,
- our knowledge of e-learning in Poland,
- possibility to evaluate Polish e-learning activities,
- possibility to poll (make surveys) Polish students,
- possibility to use our e-learning platform e-sgh.pl in projects concerning virtual campuses,
- intellectual potential of experts,
- our e-learning content, which is the best in Poland (the content includes economics, management, finance, banking, and others).

### **We are particularly interested in projects, which:**

- develop new ways of e-learning cooperation,
- join international experience,
- measure quality of e-learning programs,
- aim at creating standards for e-learning,
- help students in learning through online tools,
- create new value in e-learning,
- improve didactic skills of lecturers,
- build e-learning content.

Warsaw School of Economics (SGH) is the most prestigious and popular Polish university of economics, one of the largest economic university in Central and Eastern Europe, member of CEMS and PIM network. The university was established in 1906 and will soon have 100 years of tradition. At present, over a thousand graduates leave the school every year. They create and transform Poland's economic reality in many sectors of the economy and determine the status of our country. In the academic year 2004/2005 over 16,487 students study at SGH. This number includes 6414 full-time students, 5934 extramural students, 2905 postgraduate students and 1234 PhD students.

We started e-learning activity in October 2001. Nowadays, the university runs a few different methods of e-learning. One of them is to complement lectures and exercises in full-time, extramural, doctorate and postgraduate studies. We also publish an e-learning magazine e-mentor, which has a printed and online version ([www.e-mentor.edu.pl](http://www.e-mentor.edu.pl)).

### **Please, inform us about your current and planned projects.**
